THE BATLIGHT

THE BATLIGHT was originally designed with women in mind, for their safety and security, to be used while walking their dogs at night. It is equipped with a 120 DB siren alarm, strobing light, and shaped like a baseball bat in bright yellow. **THE BATLIGHT** most definitely presents itself as a deterrent to any threatening situation (person or animal) they might encounter.

We now realize **THE BATLIGHT** is a necessity not only to women, but also to men and children. It can be used by: joggers, children, dog walkers, college students, the elderly, event security, campers, roadside emergencies, etc. etc....

THE BATLIGHT is not the ultimate answer, but it will help to give us a more secure feeling as we go about our daily chores, i.e.: jogging during twilight hours, walking the dog, walking in the evening on college campuses (a must on the “going away to school packing list”), riding bikes during twilight hours, car emergencies (strobing light), scaring a vicious dog away (siren alarm), elderly people on their evening or morning stroll, walking to and from your car in parking lots, etc., etc.

Some of the many places **THE BATLIGHT** should be kept are: in the home, school, car, bicycle, backpack, briefcase, and purse for use at a moment’s notice. In this day and age, the most important purpose of **THE BATLIGHT** is to give us a sense of well being and security, knowing that **A DETERRENT IS WITHIN REACH AT ALL TIMES!**
