## **MR. FLEXX THE FLEXIBLE MAGNETIC FLASHLIGHT**

The most adaptable and handiest flashlight ever – with more flexibility than Houdini himself! This hands-free flashlight twists and stretches to put light where you need it. MR. FLEXX is made of rugged ABS plastic and is compact for easy storage.

Imagine being able to work on any project with perfect lighting and both hands free to complete the job. The accordion-style gooseneck lets you position the light exactly where it's needed to complete your task.

The magnetic base allows you to adhere the flashlight to most metal surfaces i.e. the hood of your car, your file cabinet, the water heater, or under the sink, etc.

It has a high-intensity Krypton bulb with a multi-faceted reflector, which eliminates the annoying dark spot that appears in the center of the beam of most flashlights.

It's perfect for the auto, boat, home, school, outdoors, work and just about everywhere.

The FLEXX light makes a great Father's Day gift or a fun stocking stuffer at Christmas.

And don't forget mom and the kids: looking for lost objects in those hard to reach places, those outdoor over-nights, reading under the covers, etc., etc.

MR. FLEXX is great for college students to use in the late evening so as not disturb their roommates. It also makes a great computer light.

Senior citizens no longer have to bend and twist to see in those dark places. MR. FLEXX DOES THE JOB FOR YOU!
